PROFILE

Frontend-focused software engineer with over 4 years of experience building clean, functional web and mobile applications using React, Next.js, and React Native. Currently pursuing a BSc in Computer Science and Statistics, with a growing focus on data analytics using Python and R. Comfortable working across the stack, from intuitive interfaces to data-driven insight, with a strong interest in minimal, functional design.

EXPERIENCE

Frontend Engineer Lead — Voima, Ghana

January 2026 – Present

- Led the frontend development team in building and maintaining the Voima mobile app using React Native and Expo.
- Collaborated closely with backend developers to ensure seamless integration and optimal performance.

SKILLS

- Web Development: HTML, CSS, JavaScript, React, Next.js, TypeScript, Tailwind CSS, REST APIs, UI/UX basics, cross-browser compatibility.
- Mobile Development: React Native, Expo — building and shipping cross-platform mobile apps.
- Data Analysis: Python, R, Excel — analyzing trends and drawing insights from data.
- Version Control: Git and GitHub for collaboration and project management.
- Soft Skills: Strong teamwork, communication, and problem-solving abilities.

EDUCATION

BSc, Statistics and Computer Science — University of Ghana, Legon

Expected October 2028

WASSCE Certificate — Pope John Senior High School

PROJECTS

LYSEON GH — lyseongh-frontend-2e7r.vercel.app

- Business website for an electrical and technical services company, built with Next.js and Tailwind CSS, featuring service showcases (CCTV, DSTV, electrical wiring) and WhatsApp booking integration.

INTERESTS

I enjoy playing video games and reading. I also like exploring new technologies, particularly in machine learning and AI.
